Permanent Cosmetics

Micro pigmentation or permanent cosmetics is the implantation of organic pigments in the uppermost layers of the skin. This process achieves a very natural enhancement to the eyebrows, lips or eyes. The technique used to deliver the pigment offers a super soft look - sure to make any woman look her best without the daily use of traditional makeup. This procedure is widely used by athletes, allergy sensitive individuals, chemotherapy patients and busy moms. This treatment is FDA approved and is virtually painless with the use of highly concentrated topical anesthetics.
